Summary

The test results demonstrated that the batch met all established specifications. The appearance was a clear, colorless to yellow liquid free from visible foreign particles. The pH was 5.2, within the specified range of 4.7 – 5.3. The purity was 99 %, meeting the requirement of NLT 97 %. The endotoxin test complied with the acceptance criterion of NMT 10 EU/mg. The microbial test also complied with the established criteria, with the total aerobic microbial count and total yeast and mold count both within the specified limits. The preservative effectiveness test was performed using *E. coli*, *P. aeruginosa*, *S. aureus*, *C. albicans*, and *A. brasiliensis*. All test organisms met the required Log_{10} reduction criteria through Day 30. Therefore, the sample complies with the acceptance criteria. Accordingly, this batch was found to be acceptable with respect to the established quality specifications.
